

VRChat: Making Requests in English

VRChat is a very popular game among English speakers;
English is the dominant language of the game.

Instructions:

1. Download the free-to-play game using any of the options they provide: <https://hello.vrchat.com/>
2. Once downloaded, open the game and find a server of interest with high proficiency English speakers. There are roleplay servers that involve different contexts such as restaurants, banks, parks, etc.
3. Find three different speakers and make 3 requests, one of low severity, one of high severity, and another of your choice.
4. Record necessary data and answer questions below.

Data & Questions:

Questions	Request 1	Request 2	Request 3
How did you make the request? What did you say and why?			
What was the response of the interlocutor?			
What did you request from the interlocutor? What was the context?			
Why do you think the interaction went as it did?
